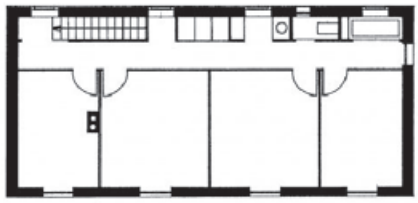
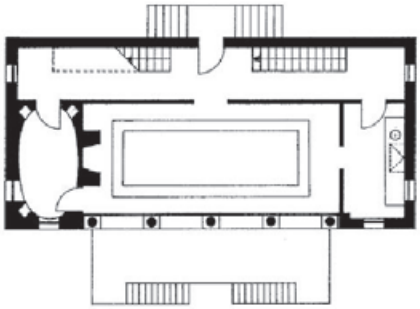
AUFGABENSTELLUNG





- Peter Märkli und Gody Kühnis, Innenansicht Cheminée,
- Grundriss OG und Grundriss EG Wohnhaus Kühnis, Azmoos, 1982

ZIEL

Analyse eines Bauteils oder einer Wohnsituation als Ausgangspunkt für den Entwurf zeichnerische Aufnahme, Umsetzung in Plan (Einzelarbeit) und Modell (Gruppe)

BAUTEN / ASSISTIERENDE

- Lux Guyer, Obere Schiedhalde, Küsnacht / CT
- Marcel Breuer, Doldertal-Häuser, Zürich / RG
- Flora Steiger-Crawford, Haus Steiger / DH
- Hans Demarmels, Rebbergsteig 7, Zürich / DK
- Justus Dahinden, Haus Dahinden, Zürich / ER
- Meili Peter/Staufer Hasler, Riff Raff, Zürich / NL
- Loeliger Strub, Hohes Haus West, Zürich / SP
-Graser Troxler, Regensbergstrasse, Zürich / FS

AUFGABE

Zum Semesterstart besichtigen Sie in Begleitung einen Referenzbau. Ihnen wird ein Bauteil oder -element zugelost, welches sich aufgrund seiner Bauweise und Materialisierung gut als Ausgangspunkt unserer Übungsreihe eignet. Als Vorbereitung für die Besichtigung am Mittwochnachmittag machen Sie sich zuerst als Gruppe mit dem Ihnen zugeteilten Wohnbau vertraut. Studieren Sie die abgegebenen Plangrundlagen. Beschaffen Sie sich Bücher in der Bibliothek, um sich möglichst umfassend mit Gebäude, Konstruktionsweise, ArchitektInnen etc. auseinanderzusetzen.

In der Gruppe bauen Sie ein Innenraummodell 1:20 als Rohbau aus Graukarton und bereiten Muster für die Darstellung der Materialien vor, die in Ihrem Objekt vorkommen. In Einzelarbeit reissen Sie die Geometrie des Ihnen zugeteilten Bauteils in Grundriss, Schnitt und Ansicht im Mst. 1:20 auf. Sie erarbeiten sich damit eine gute Grundlage für die Aufnahme vor Ort. Bei der Besichtigung ergänzen Sie im aufgerissenen Plan Geometrie, Masse und Materialität etc. Vor Ort beobachten Sie, wie sich Ihr Element in das räumliche Konzept des Gebäudes eingliedert. In welchem Bezug steht es zur unmittelbaren räumlichen Situation? Welche Materialität weist Ihr Bauteil auf? Wie ist es im Detail konstruiert? Welche Eigenheiten des Bauprozesses haben einen Einfluss auf den Ausdruck des Bauteils? Skizzieren Sie mögliche Blickwinkel für Modellfotos als Grundlage für die spätere Ausarbeitung des Modells. Das Fotografieren in den Häusern/Wohnungen ist nicht erlaubt. Anhand Ihrer Aufnahmen vor Ort zeichnen Sie Pläne im Massstab 1:20 (Linien, Texturen s/w), welche das Bauelement in seiner massgebenden räumlichen Situation zeigen. Bis zur kommenden Woche gestalten Sie mit den anderen Gruppenmitgliedern einen Abschnitt der Holzwand in der Mittelzone im Zeichensaal, welcher den Charakter Ihres analysierten Wohnhauses möglichst umfassend darstellt. Die Präsentation wird ergänzt durch Ihr Innenraummodell.

ARBEITSMITTEL ANALYSE UND AUFNAHME

- Plangrundlagen 1:100 / 1:200
- Skizzenbuch und Stifte, Zeichenmaterial
- Doppelmeter
- Körpermasse
